1. OVERVIEW OF THE PROJECT

MemePad is a next-generation launchpad built on the Solana blockchain, purpose-built to empower meme coin projects with transparency, decentralization, and advanced technology. As the meme coin space continues to explode with interest and innovation, MemePad addresses the most critical gaps in the current ecosystem—safety, fairness, and community-driven growth. It offers a frictionless and secure experience for both project creators and degens who want early access to promising tokens without falling victim to the usual crypto traps.

At its core, MemePad introduces a revolutionary fair launch mechanism that eliminates traditional risks like rug pulls, supply manipulation, and insider bundling. Developers cannot farm or hoard initial supplies, as the platform ensures that the launchpad—not the project owner—handles token distribution and liquidity provisioning. This system is modelled better than the security and simplicity of platforms like Pump.fun, but supercharged with extra layers of fairness and decentralization.

For every token launched with a market cap under \$100,000, the initial supply is proportionally distributed across a wide base of holders based on their \$MPX Staked, capping each wallet's allocation at no more than 1 SOL. This cap ensures no single party—especially KOLs or insiders—can dominate the tokenomics or execute coordinated dumps. Additionally, the launchpad itself provides and locks liquidity, removing the threat of liquidity-based rug pulls entirely.

Stability and longevity are further reinforced through a smart supply distribution strategy that fosters organic price growth and rewards long-term believers (diamond hands). MemePad incentivizes holders to support the ecosystem not just by limiting team allocations to 5%, but also by integrating staking mechanisms that offer up to 700% APY and a chance to get 2% airdrop from new tokens launched —giving users every reason to HODL.

Finally, MemePad sustains its operations with a sustainable and transparent revenue model, collecting only 2% of the total supply of each token launched. This ensures that the platform's success is directly tied to the performance and quality of the projects it supports.

With built-in AI agents, robust anti-rug features, community-first design, and a powerful staking ecosystem, MemePad isn't just a launchpad—it's the future of fair, scalable, and hype-ready meme coin launches.

2. VISION AND MISSION

The core vision of MemePad is to become the premier launch hub for meme tokens on Solana – a central rallying point for meme communities, investors, and creators. The project's mission is to empower creators (ranging from influencers to hobbyist developers) to launch their own meme coins effortlessly, while protecting and rewarding investors who support these early projects. This means implementing rigorous security measures to filter out scams, providing tools (and even AI agents) to assist launches, and cultivating a vibrant community around meme projects. MemePad envisions a secure, community-driven meme economy on Solana where anyone can participate in launching or investing in the next "PEPE" or "Shiba" sensation – with confidence in the platform's transparency and protections. In essence, MemePad's mission is to bring trust, structure, and innovation to the wild world of meme coins, elevating it from a speculative frenzy into a sustainable ecosystem.

3. WHAT IS MEMEPAD?

MemePad is a purpose-built launchpad on the Solana blockchain, engineered to revolutionize how meme coins are created, launched, and scaled in a secure, transparent, and community-driven environment. Unlike conventional launchpads, MemePad offers far more than just token deployment—it provides a comprehensive ecosystem where meme coin projects are incubated with intelligent infrastructure and long-term support mechanisms.

At the heart of MemePad is its unique “launchpad with a twist” philosophy. Every project launched through the platform gains access to powerful tools—including AI Agents that can be linked to twitter accounts. These AI-powered bots act as always-online ambassadors, capable of hosting Twitter Spaces 24/7, engaging users, and amplifying the token’s social presence in real time. This ensures that post-launch momentum is not left to chance but is continuously nurtured by intelligent, automated outreach. More than just a launchpad, MemePad functions as a hybrid between an incubator and a community amplifier. It supports fair distribution models, anti-rug mechanisms, and liquidity locks, all while giving project owners and degens access to cutting-edge tools to fuel growth.

By blending virality with verifiability, automation with decentralization, and humour with innovation—MemePad sets a new standard for meme coin ecosystems on Solana.

4. THE PROBLEM WITH MEME COIN LAUNCHES

The meme coin market has experienced explosive growth, attracting significant attention from both seasoned investors and crypto newcomers. However, the rapid rise of meme coins has also exposed serious structural and ethical issues within traditional launchpad platforms, particularly highlighted by recent controversies surrounding decentralized platforms like Pump.fun.

Pump.fun, a decentralized token creation platform built on Solana, initially gained popularity by offering users the ability to create tokens with virtual liquidity pools. While the platform's simplicity and accessibility were initially appealing, major systemic flaws quickly became apparent. A critical issue involved token creators exploiting the platform's lack of stringent anti-bundling measures, allowing teams or individuals to farm and accumulate as much as 80% of a token's total supply across numerous wallets. These actors would then manipulate token distribution and pricing, dumping their holdings onto unsuspecting investors after artificially inflating the token's value.

Additionally, Pump.fun faced significant backlash due to inadequate moderation capabilities, leading to harmful and inappropriate content being broadcasted via its live streaming feature. Reports emerged of broadcasts containing threats of violence, self-harm, and other unsafe behaviors, severely damaging the platform's reputation and prompting regulatory scrutiny. As a result, the platform experienced regulatory bans, notably by authorities in the United Kingdom, due to non-compliance with critical safety and regulatory standards. These controversies highlight key vulnerabilities common to traditional meme coin launch platforms:

Supply Manipulation and Bundling:

Lack of effective anti-bundling and anti-farming safeguards allowed creators to unfairly dominate token supplies, negatively impacting market fairness and investor trust.

Insufficient Moderation and Security Measures:

Platforms with rapid user growth but inadequate moderation infrastructure faced challenges in preventing harmful content, leading to serious community and regulatory consequences.

Liquidity and Rug-Pull Risks:

Without guaranteed liquidity locks or secure launch practices, investors frequently faced rug pulls, where liquidity was suddenly withdrawn by token creators, causing substantial losses.

5. OUR SOLUTION: THE MEMEPAD ECOSYSTEM

Recognizing these fundamental problems with launchpads, MemePad has been meticulously designed from the ground up to address and eliminate these vulnerabilities. MemePad differentiates itself by specifically targeting meme coins and integrating advanced technological and community-centric innovations to create a safer and more trustworthy platform:

- **Robust Anti-Bundling Mechanisms:** MemePad ensures equitable distribution by implementing strict allocation limits of a maximum of 1 SOL per wallet, significantly reducing the risk of supply manipulation and bundling. This prevents any team or individual from gaining disproportionate control over the token supply, ensuring a fair and balanced token distribution right from the start.
- **Secure and Locked Liquidity:** In contrast to traditional platforms, MemePad directly provides and locks liquidity for all tokens launched on the platform. This measure eliminates the threat of liquidity-based rug pulls, providing investors with transparent, predictable, and stable market conditions. By maintaining liquidity control within the launchpad, MemePad ensures investor safety and market integrity.

- **Community-Driven Fair Launches:** MemePad emphasizes transparency and fairness through stringent smart contract audits, clearly defined launch parameters, and comprehensive due diligence. It enables a community-first approach, empowering loyal members and active participants by providing exclusive early access to promising projects through the staking of \$MPX token.
- **AI Integration for Token Promotion:** MemePad introduces innovative AI Agents that project creators can deploy to enhance their token's visibility and engagement. These AI agents continuously manage social media activities, particularly on platforms like Twitter, conducting promotions and community interactions around the clock, ensuring sustained visibility and organic growth for newly launched meme coins.

6. KEY FEATURES OF MEMEPAD LAUNCHPAD

MemePad's platform comes packed with features tailored to both investors and project teams to make the launch experience smooth, secure, and rewarding:

For project creators, MemePad offers an intuitive dashboard to configure and deploy a new token in 10 guided steps. You don't have to be a Solana programmer or have deep DeFi knowledge. If you can fill a form and engage your community, you can launch a meme coin on MemePad. Low fees are a priority: launching via MemePad costs only a nominal platform fee, making it accessible even for small creators.

The launch process itself is simplified into a seamless 10-step workflow via an intuitive web interface. Project creators can configure token parameters such as supply, pricing, and liquidity settings, select an AI Agent, and deploy their contract with just a few clicks. This low-barrier, code-free experience makes MemePad ideal for creators of all backgrounds—from first-time founders to seasoned builders.

- 1. Token creator launches via a guided 10-step process.**
- 2. Users must stake \$MPX to access upcoming token private sales.**
- 3. Allocation per user capped at 1 SOL to prevent whales.**
- 4. Launches have two rounds: Party Round (stakers only) and Public Round.**
- 5. Projects move to DEXs once market cap crosses 100k MC.**

6.1 BENEFITS FOR USERS

For crypto investors and meme enthusiasts, MemePad provides something invaluable – access to projects at their inception. Stakers of \$MPX automatically gain whitelist entry into presale on the platform. In practical terms, this means if a hot new meme project is about to launch, \$MPX stakers can buy in at the floor price (often a sub \$100k market cap equivalent) before the general public. This early access is where significant ROI can be made – by the time the token lists on a DEX for public trading, its price can be multiples higher (assuming the project is successful). Thus, the platform's feature of linking launch participation to holding and staking \$MPX creates a win-win: it drives value to the \$MPX token and also forms an invested community around each new project from day one. MemePad blends professional launchpad functionality with the fun of meme culture.

MemePad serves as an exclusive gateway to early-stage, high-potential meme coins. Access to presales is gated by the platform's native token, \$MPX, meaning that only those who stake or hold \$MPX can participate in early allocations. This model not only rewards loyal community members but also helps ensure fair distribution and reduce exposure to opportunistic trading or manipulation

- 1. Early access to sub-100k MC tokens**
- 2. Stake-to-earn passive income (up to 700% APY)**
- 3. Referral earnings**

6.2 HOW IT WORKS

Launch Lifecycle from Subscription to DEX Listing:

To recap the journey in a narrative form whenever a project launches on MemePad, it goes through these lifecycle stages on our platform: 1.2

Project Approval & Announcement:

MemePad team vets and approves a project. We announce the upcoming launch to the community, including key dates and the required \$MPX holdings to participate.

Subscription Vault and Allocation:

\$MPX holders lock in their commitment. Suppose Project X needs 10,000,000 MPX to get staked (depends on \$MPX price) – the Subscription Vault allows \$MPX holders to collectively stake up to that amount and get their allocation respectively, with highest commitment getting 1 sol allocation to buy in party round. Once the vault reaches its target or time expires, those contributors are set for the next step.

Party Round Sale:

At the scheduled time, the Party Round goes live on the MemePad site. Whitelisted contributors from the subscription can now buy Project X tokens up to their allowed allocation (which could be proportional to what they committed). This round might happen at a fixed price (often the “presale price”) and usually fills a significant portion of the tokens.

Public Round Sale:

Shortly after, the platform opens the Public Round for any remaining tokens. This is accessible to the general public (often still via the MemePad interface). If demand is high, this round can close extremely quickly. If demand is lower, it stays open until the end time or sellout. Either way, when it’s done, the token sale is complete.

Token Distribution:

MemePad's contract distributes the purchased tokens to all investors.

The raised funds:

All portion automatically goes to create the liquidity pool on DEX.

DEX Launch:

MemePad creates the Raydium pool and lists the token. The initial price on Raydium is typically slightly above. At this moment, anyone can trade the token on the open market. Often, the price can jump as those who missed presale rush in – this is where early investors might see those 5x, 10x gains if the project is hot (or more, as we saw with some like BOOP).

Post-Launch Support:

After listing, the project enters its growth phase. MemePad doesn't just leave it there – we provide post-launch marketing shout outs, connect the project team with partners. Also, \$MPX stakers might receive some airdropped tokens from Project X. The life cycle then continues as we line up the next project on MemePad. Throughout this lifecycle, communication is key – MemePad constantly updates a live timeline and sends notifications (website alerts) at each stage ("Vault opens in 1 hour", "Party round is live now!", "Token will list on Raydium at 16:00 UTC", etc.). This ensures participants never miss a step in the fast-paced launch process. The end result of a successful MemePad launch lifecycle is a thriving new meme token out in the world, a happy community of investors who got in early, and \$MPX holders who have just reaped rewards and are ready for the next launch. It embodies MemePad's motto: "This isn't just a launchpad. It's a money printer." – meaning a well-oiled system that can repeatedly create value for all stakeholders involved

7. AI AGENTS: AUTOMATION FOR GROWTH

We touched on AI agents above; here we'll expand on their functionality within MemePad. AI agents for crypto meme coins are sophisticated Large Language Model (LLM)-powered virtual entities designed to automate engagement and interaction on Twitter. Project creators can easily input the unique concept, identity, and branding of their meme coin into memepad AI agents. Leveraging advanced generative AI, these models autonomously produce contextually relevant and engaging content, tweets, and replies, actively fostering online community growth and viral awareness. Moreover, the agents possess the capability to participate proactively in Twitter Spaces, effectively mimicking natural human conversation and discussion, thereby significantly increasing visibility and real-time community interaction around the meme coin.

These memepad AI-powered agents provide continuous, intelligent marketing, greatly simplifying promotional efforts for project owners by automating tasks such as real-time community engagement, promotion, and information dissemination.

This continuous interaction not only enhances organic growth and brand identity but also reduces the operational costs and manual overhead typically associated with maintaining a vibrant online presence. By autonomously engaging with trending topics, relevant crypto influencers, and community conversations, these AI agents ensure that meme coin projects maintain a persistent, dynamic, and highly visible presence on social platforms. This integration of AI ensures MemePad remains state-of-the-art, leveraging the latest tech to make the launchpad more secure, efficient, and engaging than any traditional launch platform.

8. TOKENOMICS OF \$MPX

Total Supply: 1,000,000,000 \$MPX

Allocation	Percentage	Tokens
Core Team	5%	50,000,000
Development	3%	30,000,000
Liquidity and Marketing	17%	170,000,000
Public Sale	65%	650,000,000
Staking Reward	10%	100,000,000

9. STAKING AND REFERRAL REWARDS

The MemePad Token (\$MPX) is developed on the Solana blockchain, harnessing advanced smart contract technology to facilitate secure and rewarding token staking. Participants can actively engage by staking their tokens during the Community Sale and beyond, earning dynamic Annual Percentage Yield (APY). This approach not only incentivizes early and sustained involvement but also contributes significantly to the overall stability and growth of the MemePad ecosystem.

How Staking Works

Stake Your Tokens: Upon acquiring \$MPX tokens, users can securely lock them into the dedicated staking smart contract on the MemePad platform.

Earn Dynamic APY: The APY offered through staking is dynamic, adjusting based on the total amount staked across the community and the duration of each stake. This model ensures higher rewards for earlier and more substantial commitments.

Strategic Early Engagement: Early stakers benefit from significantly higher APY rates, providing an added incentive for prompt and strategic involvement in the MemePad project.

Benefits of Staking

Passive Income: Staking allows token holders to generate passive earnings in \$MPX without actively trading.

Enhanced Earnings with Multipliers: Specific staking periods or amounts can activate multipliers, considerably increasing potential earnings and making staking more rewarding for dedicated participants.

Security & Transparency:

Staking operations are governed by robust Solana-based smart contracts, ensuring fairness, transparency, and protection against manipulation

10. CONNECTING INVESTORS AND PROJECTS

Our platform serves as an innovative bridge connecting high-quality meme coin creators with early-stage investors, fostering a transparent and equitable investment ecosystem. By harnessing the Solana blockchain, MemePad significantly enhances operational efficiency with notably low fees. These features facilitate a more accessible and responsive market environment, perfect for meme coin projects where timely execution is critical.

Additionally, MemePad incorporates stringent security and fairness measures, including comprehensive smart contract audits performed by reputable firms, to safeguard all stakeholders. Supply and wallet caps, such as a strict maximum allocation limit of 1 SOL per wallet, prevent token hoarding and ensure equitable distribution among investors. By combining these technological and regulatory safeguards with advanced AI-driven marketing tools—such as customized Twitter engagement agents—MemePad not only streamlines the launch and growth of meme coins but also significantly reduces traditional risks such as rug pulls, supply manipulation, and insider trading.

- **Low fees**
- **Speed**
- **Scalability**
- **Advanced smart contract audits**
- **Supply caps**
- **Wallet caps (1 SOL max allocation)**

11. ROADMAP AND MILESTONES

MemePad's development roadmap lays out a phased journey from concept to full-fledged ecosystem, ensuring that each milestone builds upon the last to create a robust platform and community. Below is an overview of our project timeline and key milestones:

Stage 1 – Ideation:

This initial phase (Q1 2025) focused on crystallizing the concept of MemePad. The team brainstormed ideas, researched the meme coin market pain points, and drafted the whitepaper (this document) outlining how MemePad will solve those issues. We also sketched the economic model of \$MPX and planned out technical requirements. Key deliverable: a comprehensive plan for development and launch.

Stage 2 – KOL Round and Community Growth:

With a clear plan in hand, Stage 2 involved reaching out to Key Opinion Leaders (influencers) in the crypto and meme space (Q2 2025). MemePad collaborated with select KOLs to secure their support, both in terms of early investment and marketing reach. By getting popular meme coin influencers on board early, we aimed to bootstrap community interest. Key deliverable: initial seed funding and endorsements from well-known figures ("social proof" for MemePad). The emphasis shifted to building a grassroots community. We launched MemePad's official website and social channels, and began presale marketing campaigns. This involved teaser content, early airdrop contests, and community-building on Telegram/Twitter. The goal was to grow a base of enthusiastic followers even before any token sale. Key milestone: achieving a vibrant online community and waitlist of users interested in the \$MPX presale.

Stage 3 – Presale Initiation:

In Stage 3 (Q2 2025) marked the kickoff of the \$MPX presale on our website. We opened the first round of \$MPX sales to early community members, giving them a chance to buy tokens at the lowest price. Social growth was a big focus here: referral programs (10% commissions) and bounty campaigns were activated to encourage word-of-mouth spread. Milestone: successfully conducting Stage 1 of the presale (starting price \$0.002) and distributing \$MPX to our earliest supporters.

Stage 4 – Pre-Launch Marketing:

As we approached the official launch, Stage 4 (early Q3 2025) ramped up marketing efforts to full throttle. This included broader advertising, partnership announcements, and community events (like AMAs, meme contests) to maintain momentum. Meanwhile, we prepared for token launch by finalizing the token contract, audit, and setting up initial DEX liquidity. Milestone: increasing public awareness of MemePad and ensuring all technical components (smart contracts, platform UI) were battle-tested for launch.

Stage 5 – Token Launch:

Stage 5 (Q3 2025) was the official launch of \$MPX on the market. We listed \$MPX on a decentralized exchange (Raydium) at the predetermined launch price (around \$0.017), and concurrently initiated trading on the platform. A coordinated marketing push accompanied the launch, including press releases and Tier-1/Tier-2 exchange listing plans (to list \$MPX on major centralized exchanges soon after). Milestone: a smooth launch with strong initial liquidity and price performance (targeting a ~700% increase from presale price).

Stage 6 – Strong Token Performance:

Post-launch, Stage 6 (Q3 2025) focuses on reinforcing \$MPX's value and credibility. We are actively working to get \$MPX listed on top centralized exchanges (CEX) to increase accessibility. At the same time, we're forging strategic partnerships with other projects and protocols to expand MemePad's ecosystem (for example, collaborations with Solana NFT marketplaces or DeFi platforms to broaden utility for \$MPX). The aim is to secure a robust market presence and demonstrate price stability and growth for \$MPX. Milestone: \$MPX listings on major exchanges, and at least one high-profile partnership inked.

Stage 7 – Product Launch (Platform Live):

By Stage 7 (end 2025), the full MemePad launchpad platform goes live to the public. This means all planned features – the project launch dashboard, staking portal, AI agent's integration, etc. – are deployed. We will see the first cohort of meme projects launching through MemePad. This stage is a significant milestone: MemePad transitions from being just a token to being a functional product ecosystem. Milestone: successful launch of the first few meme coin projects on the platform, validating our model of safe and hype-worthy launches.

Stage 8 – “Moon”:

The final stage in our initial roadmap (late 2025 and beyond) is metaphorically termed “Moon” – signifying MemePad’s aspiration to achieve industry-leading status. In this stage, MemePad, its token, and its launched projects are all thriving. \$MPX ideally becomes Solana’s meme launchpad standard (targeting a multi-hundred-million market cap itself), and numerous meme tokens launched via MemePad have achieved success, reinforcing the platform’s reputation. We envision MemePad’s ecosystem scaling rapidly here, possibly branching into additional offerings (like a DAO venture fund called MEME Capital as a long-term vision). Milestone: establishing MemePad as a top-tier launchpad network and commencing the transition towards MEME Capital, a community-driven crypto VC arm that allows \$MPX holders to invest in early-stage projects beyond memes. Through this structured roadmap, MemePad is executing a plan to grow from an idea into a dynamic, enduring ecosystem for meme enthusiasts and investors alike. Each stage has clear objectives that de-risk the next one – building community first, then raising funds, then launching product, and finally scaling up. The roadmap also leaves room for future developments: the mention of MEME Capital hints at our ambition to evolve beyond a launchpad into a decentralized venture platform, where the community can collectively back not just meme coins, but any promising ventures in a memeified way. This forward-looking approach ensures MemePad can continue to innovate and remain relevant as the crypto landscape evolves.

12. CONCLUSION AND CALL TO ACTION

MemePad is an innovative launchpad built on the Solana blockchain, meticulously designed to empower meme coin projects through unparalleled transparency, advanced decentralization mechanisms, and state-of-the-art technology. As the meme coin market continues to flourish with dynamic innovations and heightened investor interest, MemePad strategically addresses the critical gaps plaguing traditional launch platforms—specifically issues related to safety, fairness, and community-driven growth. Through rigorous smart contract audits, anti-rug measures, and equitable supply distribution, MemePad effectively mitigates common crypto pitfalls such as rug pulls, supply manipulation, and insider bundling.

Central to MemePad's revolutionary approach is its sophisticated launch mechanism, which caps individual wallet allocations at 1 SOL for token launches under a \$100,000 market cap, ensuring a broad and diverse initial distribution. The platform's unique liquidity provision system locks initial liquidity to prevent liquidity-based rug pulls entirely, thereby fostering trust and confidence among investors. Additionally, MemePad's robust staking ecosystem offers lucrative incentives, including dynamic APY rates up to 700%, further enhancing long-term investor engagement and ecosystem stability.

What truly differentiates MemePad is its pioneering integration of AI-powered agents, designed to sustain momentum and drive organic growth post-launch. These intelligent AI agents autonomously engage with the community, amplify token visibility, and maintain active promotional activities on platforms like Twitter. By reducing manual intervention and operational costs while maximizing community interactions, MemePad creates a thriving and self-sustaining environment for meme coins to flourish. MemePad is more than a launchpad—it's a comprehensive, secure, and future-proof solution dedicated to redefining the meme coin investment experience for creators and investors alike

13. RISK DISCLAIMER

General Risk Warning

Memepad.org and its associated tokens (\$MPX) involve highly speculative investments with substantial risk of total loss. Memepads token \$MPX is a meme coin and not a security in any way, shape or form. Investing in any cryptocurrency carries risk, particularly meme coins. This whitepaper is for informational purposes only and does not constitute investment advice. Prospective participants should consult their financial advisors before making decisions.

Cryptocurrencies are volatile, unregulated in many jurisdictions, and may have no intrinsic value. Past performance is not indicative of future results. Investors must assess their financial capacity to bear risks and seek independent professional advice before participating. There is also no guarantee that Memepad.org's investment objective will be achieved.

Not Financial or Legal Advice.

Nothing in Memepad.org whitepaper, website, or community channels (Telegram, Twitter, Discord, etc.) constitutes investment, financial, legal, or tax advice. All materials are for informational purposes only and do not guarantee future performance, utility, or returns. Decisions to participate are made at your sole risk. This whitepaper does not constitute any investment advice, financial advice, trading advice, or recommendation by Memepad.org, its affiliates, or its respective officers, directors, managers, employees, agents, advisors, marketers, or consultants on the merits of purchasing \$MPX tokens, nor should it be relied upon in connection with any other contract or purchasing decision. Nothing in Bitcointalk, Reddit, Discord, Telegram, Twitter, this white paper, or the website is, or should be relied on as, a promise or representation as to the future. Memepad.org or any associated party make no representation regarding the likelihood or probability that any actual or proposed account allocation will in fact achieve a particular investment outcome or goal.

No Liability Assumed

Memepad.org is a meme, decentralized, community-driven platform for fun—not a registered company, financial service, or legal entity. The team, contributors, and affiliates disclaim all liability for losses, damages, or claims arising from:

•Token purchases, trades, or holdings.

- **Smart contract vulnerabilities, hacking, or technical failures.**
- **Regulatory actions, tax implications, or market risks.**
- **Reliance on third-party data, translations, or illustrative examples.**

Regulatory Compliance

Memepad.org operates without endorsement from any government or regulatory authority. Token sales may be restricted in your jurisdiction; you are solely responsible for compliance with local laws. Regulatory changes may adversely impact token utility or value.

Third-Party Content & Translations

References to projects, partnerships, or pricing are illustrative only and imply no endorsement. Translations of materials are non-binding; the English version governs in case of discrepancies.

Investment Caution

Purchasing \$MPX tokens is not equivalent to acquiring equity, debt, or any claim on assets. Tokens confer no ownership rights and are not insured. Purchasing \$MPX tokens involves substantial risk and may lead to a loss of a substantial or the entire amount of money involved. Prior to purchasing \$MPX tokens, you should carefully assess and take into account the risks, including those listed in any other documentation.

Holders assume all risks, including:

- **Permanent loss of access or funds due to security breaches.**
- **Illiquidity, price volatility, or token delisting.**
- **Changes in tax treatment or legal status.**

Acknowledgment of Risk

By interacting with Memepad.org, you affirm that you:

1. Understand and accept these risks.
2. Are not relying on Memepad.org for legal, financial, or technical assurances.
3. Waive all claims against contributors, team members, affiliates, and community members.
4. Memepad token \$MPX may lose its value in part or in full
5. Memepad token \$MPX may not always be transferable
6. \$MPX the crypto-asset may become illiquid
7. Memepad token \$MPX may not be exchangeable against the good or service promised in the crypto-asset white paper, especially in the case of a failure or discontinuation of the crypto-asset project.

Regulatory Changes:

The status of crypto-assets is subject to evolving laws. If local regulations forbid participation, you may be restricted from holding or trading the token.

Consult Professionals:

Independent legal, tax, and financial advice is mandatory before participation.
